Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5, 8, 10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Walker (US 6,497,285).

The perforating device is met by perforator of Fig. 2, which comprises a tubular body member 52, having inwardly shaped hole penetration areas. The hollow cone shaped charge is met by shaped charge 56. The arched geometric shaped in said inwardly shaped hole penetration area is met by Figs. 5 and 7 where longitudinal flat area at its bottom is located, and Fig. 9, where a radius shaped hole penetration area is shown.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4, 6, 7, 9, 11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker (US 6,497,285).

Walker basically shows everything with the exception of the inwardly shaped hole penetration being elliptical, such a modification in examiner's view amounts to a simple

matter of design option to one of the ordinary skill in the art, because it has been held that merely changing in size, shape without special functional significance are not patentable. [**Research Corp. v. Nasco Industries, Inc.**, 501 F2d 358; 182 USPQ 449 (CA 7), cert. denied 184 USPQ 193; 43 USLW 3359 (1974)].

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gilbert, Robinson et al, and Oestreich et al all teach perforator housings have multiple recesses.
